

# Materials: A Very Short Introduction

[Materials: A Very Short Introduction 下载链接1](#)

著者:Christopher Hall

出版者:Oxford University Press

出版时间:2014-10

装帧:Paperback

isbn:9780199672677

Looks at a wide range of materials from steel, concrete, and plastics to wood, semiconductors, oil, gas, and food

Considers materials within their scientific, industrial, and cultural context - influencing communications, the media, architecture, building, and the fine arts

Explains how materials are made and how they behave as we use them

Shows how material science brings together engineering and technology with physics, chemistry, and biology

Part of the bestselling Very Short Introductions series - over six million copies sold

worldwide

The study of materials is a major field of research that supports and drives innovation in technology. Using modern scientific techniques, materials scientists and engineers explore and manipulate materials, and create new ones with remarkable strength and extraordinary optical and electrical properties. In this Very Short Introduction, Christopher Hall looks at a wide range of materials, from steel, wood, and rubber, to gold, silicon, and graphene, describing how materials are used, how their properties arise from their internal structure, and how useful and novel things are made from them. He concludes by looking at how the global scale of materials consumption now threatens the goal of sustainability.

**ABOUT THE SERIES:** The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

**Readership:** Will be of interest to students studying engineering and the physical sciences, and to material scientists and engineers.

作者介绍:

Christopher Hall, Professor Emeritus and Senior Professorial Fellow, University of Edinburgh

Christopher Hall is Professor Emeritus and Professorial Fellow at the University of Edinburgh, where he was previously Professor of Materials. He is a Fellow of the Royal Society of Edinburgh, and a Fellow of the Royal Academy of Engineering.

目录: 1: Gold, sand, and string  
2: Close observation  
3: Tough but slippery  
4: Electric blue  
5: Making stuff and making things  
6: Such quantities of sand
