The ferocious, snarling beast closing in on you fast has a toothache. In the white wastelands of the Arctic, there is nowhere to hide. "Where" is that helicopter?

Despite surviving this nightmare, award-winning photographer Norbert Rosing loves the charming, playful side of the polar bear. Yes, they slashed his tires, but mankind is now ruining their climate and environment. Surely the bears' anger is understandable. Rosing's book connects children with the consequences of global warming, and gives practical advice on how to help save our white-furred friends.
