Welcome young readers to the world of animals Each book provides basic information on an animal's appearance, habitat, mating, care of the young, eating habits, and enemies in the wild. Fascinating photography complements and clarifies the text. Fun Facts capture readers' imaginations. This series is perfect for students writing first reports. This series explores and supports the standard "The Living Environment: Interdependence of Life," as required by Benchmarks for Science Literacy: Project 2061.
