Made for those two moments in the day when parents and young children spend quality time together, here are two marvelous gifts--two innovative additions to the bestselling BRAIN QUEST series, each combining a single full-color deck with an adorable animal companion. BRAIN QUEST BATHTIME offers 10 original poems and stories and over 100 questions and answers on the very subjects kids want to talk about while splashing around in the tub with Mom or Dad keeping them company. Is there such a thing as a flying fish? How many legs does an octopus have? Is sea water salty or sweet? There is silly stuff--say "toy boat" five times fast; "Little Scientist"--what would happen to an ice cube if it fell into your warm tub?; and questions about the human body and basic health. The deck is printed on waterproof paper and comes packaged with a yellow terrycloth duck that doubles as a bath mitt (and often appears in the illustrations). See also Brain Quest Bedtime.
