著者:Harris, Caroline

出版者:Houghton Mifflin

出版时间:2006-10

装帧:HRD

isbn:9780753459836

Weather introduces children to the atmospheric world around them, from sun and wind to climate and temperature. Readers can look at snowflakes in amazing detail, discover the water cycle, and learn how rain forms in clouds. The devastating effects of extreme weather are revealed, as well as how rescue services help out. The book shows how weather is used as an alternative energy, but also how people affect the climate through pollution.
