Ever since her father's suicide, Kerri Langston has been tortured by visions of his death, which make her believe he was murdered. With no way to prove her theory, her psychic visions only serve to upset her mother and give her the reputation of being a freak. When Kerri stumbles upon a body in the woods near Deacon Pond, she realizes her strange connection with the dead might help solve a crime, but there is someone close to Kerri who will stop at nothing to ensure that her visions remain hidden.
