For Freshman/Senior-level courses in Career Planning, Career Development, and Job-Seeking Skills. Focused solidly on "doing" rather than on "explaining," this text gets right to the heart of career decision making: It 1) walks students through the process of

self-knowledge and self-discovery, 2) encourages them to believe in themselves and in their own ability to influence outcomes and achieve their career goals, and 3) guides them in working with various job/career-search and development tools in progressively demanding tasks to make their goals become a reality. This edition offers expanded use of electronic and internet resources, an update of Maslow,s Hierarchy, and a new perspective on decision making.
