""In New York City, there are at least three times as many doors as people. I work behind those closed doors. I work in darkness even when the light is on. My name is Night and I do night work."" Dark-skinned chocolate, sexy and smooth, Night earns his keep by pleasuring rich white women around New York City. But he's grown weary of this seedy, criminal life. If he could just get someone to sign him to a record deal, he'd willingly say good-bye forever to the emotionless sex that is slowly numbing his soul. Just when his dream of becoming an R&B vocalist is about to be realized, Beth Ann, a beautiful supermodel deep in debt to a dangerous drug ring, begs Night to help her move a large quantity of Ecstasy. He reluctantly agrees, but the good deed sinks him deeper into the nightlife he's been trying so desperately to escape. It also puts him on the radar of the NYPD, and when one of Night's clients is found murdered the cops are

quick to add it all up against him. Now Night must fight the fallout of his past and try to forge a path back to his future, before it takes off without him. A stunning portrait of the unholy intersection of New York's sexual underground and the entertainment business, this gripping novel will appeal to fans of Chester Himes, Donald Goines, and other noir masters.
