Bring home the magical experience of a child's first trip to the aquarium, with it's scary sharks, touchable tide pools, and brightly coloured marine life. One quick glance will make every child want to dive right into the "Under The Sea Poster Book". Thirty full-colour, pull-out portraits of fantastic sea creature feature ocean residents from

Whales to Octopi, plus all the fun facts that make each creature unique and exciting. Did you know, for example, that the Sarcastic Fringe Head fish looks like it's smiling, but it's really quite grouchy? Or that the Jellyfish doesn't have a brain or a heart? Actually, it isn't even a fish! Designed to be read like book, individual pages can then be pulled out to post and create an enticing deep-water environment in any child's room.
