isbn:9781932425659

Creepy, crawly creatures are brought to life through fun facts and vibrant, realistic illustrations. Naturalist Hans Post explores in tremendous detail the complex worlds of dozens of insects, birds, mice, and other tiny critters with which we share our planet. In Creepy Crawlies he presents the life, behavior, and physical characteristics of one creature on each page, while also imparting his passion for the preservation and protection of their natural world.
