出版时间:2007-1

装帧:Pap

isbn:9780836878516

Children are fascinated by animals that prowl and pounce in the night. By focusing on night animals, this series provides a captivating introduction to life science. At the same time, the simple text builds important vocabulary and reading skills. Each book in the series includes: - Text that supports first-grade science curriculum standards for life science- Text that has been vetted by both a reading consultant and a science curriculum consultant- Diagrams showing how particular adaptations such as echolocation and eyesight work- Exciting, full-page photographs of night animals in action
