isbn:9789059050457

Intended for senior citizens who are already familiar with Windows XP, this straightforward guide takes users through the new features of Windows Vista in a simple, step-by-step manner. With plentiful screen-shots and large print, this learn-as-you-go book is designed to use right alongside the computer while

performing tasks laid out in each chapter. Focusing on acquiring new skills, this basic guide will help users become familiar with features of the Windows Vista operating system, including back-up and restore, the media center, photo gallery, searching and organizing files, the security center, user accounts, and family safety.
