isbn:9780789729699

Absolute Beginner's Guide to Microsoft Office PowerPoint 2003 enables readers to quickly create exciting presentations using the following features: Packages, a new feature which includes ready to run presentations that can be burned directly to CD, including linked information. It replaces Pack and Go from earlier versions; Smart Tags,

a new feature that creates a special shortcut menu to provide additional options related to a particular feature. These include dates, time, addresses, or AutoCorrect; The AutoContent Wizard, which walks the user through each step of creating a new presentation; Views such as the Outline View and the Slide Sorter, which make it easy to arrange presentation slides in a logical order; Design templates, which enable color, background patterns, and special fonts to be added to slides in the presentation; Animations schemes, which can be used to add transitions between slides.
