Build, secure, scale, and maintain Citrix on Windows. New and existing Citrix engineers will learn to design and deploy an enterprise-level server-based computing (SBC) environment on Windows Server 2003 using Citrix Access Suite 4.0. This official guide explains how to maximize the suite components to enable and manage secure access

to applications and data across the Internet, intranets, extranets, and WANs, LANs, and wireless networks. It contains helpful checklists and technical best practices. It covers all products in the Citrix Access Suite.
