Girls are concerned about their looks, their clothes, their bodies, and relationships at a younger age and in a whole new way than even one generation before them. They come across as confident and bold in the way they dress and talk, but most of them are wrestling with the changes they are going through every day. "Designer Genes" will show girls ages 9 to 13 that their self-worth goes far beyond the jeans they wear . . . that is found in their God-designed genes. They are valuable not because of the acceptance or approval of others, but because God lovingly and uniquely created them each with purpose. Girls will get help in sorting out and untangling the mess this world has made of their values. Topic by topic, the girls who read "Designer Genes" will have the opportunity to search their hearts, to search Scripture, and to make courageous decisions about how they will live their lives. Categories that will be covered include: Your Body, Your Relationships, Growing up, Your Soul, The Things You Do, The World Around You, The Influence of Media, and more. Start any day the One Year Way Do-able. Daily. Devotions. This book helps your child connect with God every day ... the One Year way. With the easy-to-use One Year format, each week introduces a new topic (52 in all) and includes Scriptures and questions for each day that examine the topic of the week in greater depth. Also includes fun puzzles and activities, and a Scripture index is included in the back.
