Through beautiful paintings and photography, the America's First Peoples series brings young readers into the unique cultures of American Indian tribes and nations. These books take a close look at the rich traditions that helped shape the lives of American

Indians in the past and today. This series explores and supports standards under "The History of Students' Own State or Religion," and "The History of the United States," as required by the National Center for History in the Schools; and "Culture and Cultural Diversity," "People, Places, and Environments," "Individual Development and Identity," and "Individuals, Groups, and Institutions," as required by the National Council for the Social Studies.
