Beneath your skin there is an amazing hidden world of living cells. Millions and millions of cells work together, to make everything that is you. But did you know that you started life as just one tiny cell? And did you know that everything that lives on Planet Earth is also made of these cells? The "Enjoy Your Cells" series offers children a simple but scientifically accurate commentary, complemented with colourful graphics to take young readers on an entertaining exploration of the amazing, hidden world of cells, proteins, and DNA. With these books, children should learn to enjoy their cells and current affairs at the same time, in addition to getting information that has been

written and reviewed by working scientists.
