The simple act of reconnecting children with nature is the purpose of and inspiration for this text. It presents 12 easy-to-implement ideas for theme gardens that parents and children can grow together. Each garden includes a plan, planting recipe-seeds, seedlings, and growing instructions spelled out step-by-step, plus activities. There are themed gardens like the "Pizza Patch" and the "Moon Garden", and a list of the top 20

plants for children.
