From Carolyn Haywood, author of the beloved Betsy series, here are four more classics for young readers. These adorable stories of childhood adventures are as fresh today as when they were written more than a half century ago. And now, thanks to dynamic new covers, they're ready to charm a whole new generation of readers. Penny's name is really William, but when he was adopted as a baby, he had hair the color of a new copper penny. Adopted or not, Penny decides to prove his friend Patsy wrong when she says he doesn't truly have a family!
