出版时间:2003-8

装帧:LIB

isbn:9780766020702

This series of elementary-level books looks at different explorers and their early years. How were these voyages planned? Land and regions that were reached and explored are discussed, as well as any results of these explorations. These books contain a timeline, words to know, a further reading list with Internet addresses, and an index. Each book will be in chapter format, and use simple sentences. Each book will have color and black and white illustrations.
