装帧:HRD

isbn:9780313331008

Early childhood education has reached a level of unprecedented national and international focus. Parents, policy makers, and politicians have opinions as well as new questions about what, how, when, and where young children should learn. Teachers and program administrators now find curriculum discussions linked to dramatic new understandings about children's early learning and brain development. Early childhood education is also a major topic of concern internationally, as social policy analysts point to its role in a nation's future economic outlook. As a groundbreaking contribution to its field, this three-volume handbook discusses key historical and contemporary issues, research, theoretical perspectives, national policies, and practices.
