出版者:John Wiley & Sons Inc

出版时间:2006-8

装帧:Pap

isbn:9780471697602

In Hands-On Science Mysteries for Grades 3-6 , the authors connect science to real-world situations by investigating actual mysteries and phenomena, such as the strange heads on Easter Island, the ghost ship Mary Celeste , and the “Dancing

Stones” of Death Valley . The labs are designed to encourage the development of science inquiry, in which students will observe, take notes, make diagrams, interpret data, and arrive at solutions, and include extensions for further investigation.
