出版时间:2006-5

装帧:Pap

isbn:9780810856431

Exclusively written for teenagers and young adults dealing with a wide variety of learning disabilities_including Attention Deficit Hyperactivity Disorder (ADHD), dyscalculia, and dyslexia_this accessible resource offers the tools for taking a proactive role in identifying, understanding and overcoming the obstacles facing teens with learning disabilities. Learning Disabilities provides a clear and informative overview of the most common disabilities. Appealing to teenagers with its easy-to-read format and positive tips for success, the book also teaches students how to advocate for themselves, informing them of their rights under law both during the school years and after high school graduation. Assistive technology that can help students improve their learning abilities such as Optical Character Recognition (OCR) systems, screen reading software, books on tape, electronic notebooks, and other tools that aid student learning are covered. The most recent research on brain structure and function, and the role they play in learning disabilities is presented, as well as a step-by-step guide to test reports, so that teens can understand how their disabilities are diagnosed. Gathering information from students, high school guidance counselors, and from medical and other professionals, authors Paquette and Tuttle also show teens they are not alone in their struggles, profiling famous people that also have learning disabilities.
