For graduate or masters level Curriculum courses. In its 7th Edition this "standard" of curriculum texts addresses the new definition of curriculum development resulting

from emerging technologies. Continuing the historic strength of the text in history, philosophy, and foundations of curriculum development, this edition features new chapters addressing standards-based education, technology, and future directions for education. A new applications chapter has been added to provide readers an opportunity to apply chapter book content using time-tested activities and problems, engaging readers with the new problems and issues of the 21st Century.
