Culinary queen Angie Amalfi has a way with food and people, but her newest business idea is turning out to be shakier than a fruit-filled gelatin mold. Her first--and only--clients for "Fantasy Dinners" are none other than a group of UFO-chasers and government conspiracy fanatics. Though Angie is more interested in what aliens eat than the Prometheus Group's outlandish theories, still, business is business, and she vows to create an authentic dinner her clients won't forget. Besides, she's got plenty of free time since her hunky cop boyfriend, Paavo, might as well be off on another planet he's so wrapped up in investigating a series of bizarre murders. The more Angie unearths about her slightly off-center clients, however, the more she starts to believe in a conspiracy theory of her own, one linking her feast to Paavo's case. It seems the Prometheus Group has more on its agenda than just cooking up fake abductions. The truth is out there and Angie is determined to get it. This time, though, her curiosity just might take her out of this world--for good. Look inside for fabulous recipes!
