In wildlife conservation, rewilding refers to restoring habitats and creating corridors between preserved lands to allow declining populations to rebound. Marc Bekoff, one of the world’s leading animal experts and activists, here applies rewilding to human attitudes. Rewilding Our Hearts invites readers to do the essential work of becoming reenchanted with the world, acting from the inside out, and dissolving false boundaries to truly connect with both nature and themselves.

作者介绍:

Marc Bekoff is professor emeritus of ecology and evolutionary biology at the University of Colorado, Boulder. He has worked alongside leading writers and activists including Jane Goodall, Peter Singer, and PETA cofounder Ingrid Newkirk. He lives in Boulder, CO.
