The release of Java SE 8 introduced significant enhancements that impact the Core Java technologies and APIs at the heart of the Java platform. Many old Java idioms are

no longer required and new features like lambda expressions will increase programmer productivity, but navigating these changes can be challenging.

Core Java® for the Impatient is a complete but concise guide to Java SE 8. Written by Cay Horstmann—the author of Java SE 8 for the Really Impatient and Core Java™, the classic, two-volume introduction to the Java language—this indispensable new tutorial offers a faster, easier pathway for learning the language and libraries. Given the size of the language and the scope of the new features introduced in Java SE 8, there's plenty of material to cover, but it's presented in small chunks organized for quick access and easy understanding.

If you're an experienced programmer, Horstmann's practical insights and sample code will help you quickly take advantage of lambda expressions (closures), streams, and other Java language and platform improvements. Horstmann covers everything developers need to know about modern Java, including

- Crisp and effective coverage of lambda expressions, enabling you to express actions with a concise syntax
- A thorough introduction to the new streams API, which makes working with data far more flexible and efficient
- A treatment of concurrent programming that encourages you to design your programs in terms of cooperating tasks instead of low-level threads and locks
- Up-to-date coverage of new libraries like Date and Time
- Other new features that will be especially valuable for server-side or mobile programmers

Whether you are just getting started with modern Java or are an experienced developer, this guide will be invaluable for anyone who wants to write tomorrow's most robust, efficient, and secure Java code.

作者介绍:

Cay S. Horstmann is the author of Java SE 8 for the Really Impatient (Addison-Wesley, 2014), Scala for the Impatient (Addison-Wesley, 2012), is principal author of Core Java(TM), Volumes I and II, Ninth Edition (Prentice Hall, 2013), and has written a dozen other books for professional programmers and computer science students. He is a professor of computer science at San Jose State University and is a Java Champion.

评论

从Stream开始就变成流水账。

我觉得比 Core Java 两卷本讲得好些，虽然都是同一个人写的。

没有2卷的core Java好.

Java主要知识点。优点是没那么多没用的，缺点是示例代码不完整

书评

的缺是写给 “大忙人”

看的。断断续续，花了一个星期（就）看完了。之后可以当做参考书，当然，可能没那么全面。对于 Java 这么繁琐的语言，能压到 460 页的内容，很不容易！对了，还有习题！想快速了解 Java，我推荐这本书。至于翻译，个人觉得还行，偶尔有点错误或不通...
