Grades 1-3 - Glyphs are a way to represent information in picture or graphic form and

an exciting way for students to collect, display, and interpret data. With a step-by-step approach, elementary students are introduced to data analysis and enhance basic and more advanced math skills. The reproducible activities in this book support the data analysis standard required by the National Council of Teachers of Mathematics (NCTM). A thorough introduction to glyphs and how to incorporate them into your lesson plans is provided along with a parent letter and sample assessment page.
