For courses in teaching students with mild disabilities and students at risk for school failure. Also for courses in teaching students with disabilities in inclusive and Special Education settings. This top-selling practical, research-based text contains the resources teachers need to make informed decisions concerning their students with

learning or behavior problems, making it the most useful methods text on the market. Prided for its unique and comprehensive coverage of classroom assessment and methods for the content areas, it assists teachers in finding effective practices to facilitate instruction of students with learning problems.
