isbn:9780415276511

Many aspects of business management are applied in education management. These include the management of applied individual psychology; organisational psychology; individual, interpersonal and group interaction; personality theory; leadership theory and organization theory. Education management uses these business strategies, and applies them to managing the curriculum and learning, and education policy implementation at national, local and school level. Educational Management: Major Themes in Education explores the historical context, the training and development of leaders and their roles in leading people and managing resources, and provides a focus on the major management issues which are current throughout the education world.
