Master traditional woodturning techniques while crafting beautiful, practical projects.

Collected from Woodturning magazine, these more than 20 projects can be done on a basic lathe using standard tools and equipment by turners with little prior experience. Generously illustrated in color, the user-friendly instructions are filled with guidance from the author, a noted woodturner. Most of the projects can be completed in one day, some in a few hours. Make a fruit bowl, lidded box, candlesticks, mug tree, and more.
