Zaha Hadid's highly inventive and seemingly unbuildable designs have defied conventional ideas of architectural space and construction. The BMW Central Building in Leipzig, Germany is no exception. It is the heart of the BMW factory complex - the dynamic focal point of the entire plant that visually, physically, and experientially sustains a sense of animation and motion. With an audacious and abstracted geometry of forms and lines, the BMW Central Building challenges the notion of

building as static and is definitive evidence of architecture as art. "Zaha Hadid/BMW Central Building", the seventh volume in the "Source Books in Architecture" series, provides a comprehensive look at this instant modern masterpiece.
