著者:Howard, Philip

出版者:Routledge

出版时间:2007-2

装帧:HRD

isbn:9780415306621

This is a comprehensive and practical guide to surveying for archaeologists, with clear instructions in, archaeological mapping, recording field work and detailed case studies from the UK, Europe and the US. Philip Howard provides a user's guide to methods and instruments of surveying to enable archaeologists to represent their own fieldwork confidently and independently. "Archaeological Surveying" is an invaluable resource which: provides beginner's instructions to software used in computerised surveying, including IntelliCAD 2000, Terrain Tools, Christine GIS and Global Mapper; introduces the archaeologist to a range of surveying instruments such as GPS, electronic distance measures, theodolites and magnetic compasses; and, includes low-cost software. This textbook is an essential read for any field archaeologists who are in need of an introduction to surveying, or simply wish to update their techniques.
