At the time of Claude-Nicolas Ledoux's death in 1806, Ledoux had published one volume of 125 plates focusing on his plans for a Utopian city. He had also completed 175 additional plates for future publications. Daniel Ramee assembled all 300 plates in

two volumes in 1847. Here, the original Ramee edition has been reproduced in a single volume and includes an introduction by Anthony Vidler.

评论

直到看这本书，我才有了最喜欢的建筑师。

-----

这本书如果不放在当时17-18世纪的背景下是很难理解的一本书换句话说这本书完全不是你初读随便翻翻想象的那样再加上vidler的理论对于理解勒杜建筑的初读者来说反而造成诸多障碍中文关于勒杜的写作错漏百出基本学术常识和背景都不具备
