Pamphlet Architecture was begun in 1977 by William Stout and Steven Holl as an independent vehicle for dialogue among architects, and has become a popular venue for publishing the works and thoughts of a younger generation of architects. Small in scale, low in price, but large in impact, these books present and disseminate new and

innovative theories. The modest format of the books in the Pamphlet Architecture Series belies the importance and magnitude of the ideas within.

Too ambiguous. You had so many examples and didn't come up with a clear explanation between programming and hybrid.
