This is an exquisitely illustrated exploration of Oudry's portraits of Louis XV's royal menagerie at Versailles. Jean-Baptiste Oudry (1686-1755) was one of the most popular and respected artists of his generation, working not only with paints but also as a tapestry designer and highly respected illustrator. "Oudry's Painted Menagerie" is a beautifully illustrated volume that focuses on the series of life-size portraits he painted of the animals in Louis XV's royal menagerie at Versailles - including a tiger, a lion, a leopard, and Clara the rhinoceros who was a public sensation when she "toured" Europe. Intelligent and insightful essays place the paintings within the context of Oudry's career, as well as discussing his remarkable animal drawings, and present a

fascinating history on the popularity of menageries.
