Many readers today associate the early modern history play with Shakespeare. While not wishing to ignore the influence of Shakespeare, this collection of essays explores other historical drama between 1500 and 1660, covering a wide range of different formats outside the canon of 1590s history cycles. An introduction provides a survey of current criticism, including both early modern and contemporary definitions of the 'history play'. Individual essays in chronological order explore genres that perform 'history' in different ways, such as shows, moralities or closet drama. In this way this collection establishes alternative paradigms of early modern historical drama.
