Will Self has one of literature's most astonishing imaginations, and in *How the Dead Live* his talent has come to full flower. Lily Bloom is an angry, aging American transplanted to England, now losing her battle with cancer. Attended by nurses and her two daughters -- lumpy Charlotte, a dour, successful businesswoman, and beautiful Natasha, a junkie -- Lily takes us on a surreal, opinionated trip through the stages of a lifetime of lust and rage. From '40s career girl to '50s tippling adulteress to '70s PR flak, Lily has seen America and England through most of a century of riotous and unreal change. And then it's over. Lily catches a cab with her death guide, Aboriginal wizard Phar Lap Jones, and enters the shockingly banal world of the dead: the suburbs. She discovers smoking without consequences and gets another PR job, where none of her coworkers notices that she's not alive. She gets to know her roommates: Rude Boy, her terminally furious son who died in a car accident at age nine; Lithy, a fetus that died before she ever knew it existed; the Fats, huge formless shapes composed of all the weight she's ever gained or lost. *How the Dead Live* is Will Self's most remarkable and expansively human book, an important, disturbing vision of our time.
