Deploying an original 'Social Evolution Paradigm' (SEP) and drawing from anthropology, evolutionary biology, and international relations, this book advances a sweeping account of the systemic transformation of international politics. More specifically, the book shows how the nasty and brutish Hobbesian/offensive realism world many of us take for granted had evolved from an Eden-like paradise; how the Hobbesian world had self-transformed into a more peaceful defensive realism world from 1648 to 1945; and how some regions of the post-1945 world have become more rule-based and peaceful. The book critically engages with all the key grand theories of international politics and provides neat solutions to some of the 'great debates' between those theories, from offensive realism to defensive realism, neoliberalism, the English School, and constructivism. This book is essential reading for scholars and students of international politics and of interest to those working in anthropology, sociology, political science, and social sciences in general.

作者介绍:

Shiping Tang has very broad research interests and has published widely. He is the author of *A Theory of Security Strategy for Our Time: Defensive Realism* (Palgrave-Macmillan 2010) and *A General Theory of Institutional Change* (Routledge, 2011). He is also the co-editor of *Living with China: Regional States and China through Crises and Turning Points* (Palgrave-Macmillan 2009). His most recent publications include many articles in leading journals in international relations, comparative politics, and philosophy of social sciences. His next book is *On Social Evolution*. He is Professor at the School of International Relations and Public Affairs (SIRPA), Fudan University, Shanghai, China.

书评

开场白【这本书的由来】
这本书的起点应该是2002年，虽然中间断断续续，但是我真的是花了十年时间才完成这本书。2003年我在《中国社会科学》上发表的《国际政治理论的时代性》虽然只是从一个非常小的角度切入，但是我认为思想的闪光已经都在了。我认为做科学研究非常需要一种in...

内容很赞，给了我认识社会的一种视角，虽然我对国际政治没有什么兴趣，但通过阅读本书勾起我去了解人类学和福柯的兴趣。看完后上豆瓣看，发现评分从之前的7点几，降到了现在的6点几。翻低分评论看到一群zz，遂从4星拉到了5星。品这NC评论，叫人想吐。连书都没懂，...

作者是分子生物与遗传学博士，国际政治学教授。本书成于2012年左右。先有英文版，后翻译为中文版。作者自称是最后一个关于国际体系的演进的系统理论。

作者将演化论机制，变异—选择—遗传，用于解释社会演化。将观念视为基因，而将制度安排视为表现型。认为，国际政治一直是一...

本书的核心观点认为：不存在一个国际关系理论能解释所有历史的国际关系，个人以为，对时间（time）的强调大抵是本书的精髓。

本书主要探讨了包含进攻性现实主义——防御性现实主义——新自由（制度）主义三种理论的关系。而建构主义在作者来看，因为完全忽视了物质因素，所涵盖...

In this book, Shiping Tang provides a clear evolutionary logic to explain how and why the international system evolves from one phase to the next. And he gives us many examples and scholars' views to explain the transformation of international systems, whic...

http://blog.sina.com.cn/s/blog_4cdb59f80101g73b.html 各位老师、各位同学上午好：不久前，我在一本描写西藏喇嘛的书里看到一个说法，活佛们圆寂之后，他们的灵魂会重返人间并在一位幼童的躯体里安顿下来，这便是所谓的“转世灵童”的说法。据我的有限阅读来说，这一灵...
