The 20th century is acknowledged to be the century of design and this fact is highlighted in this new publication edited by ICSID, the International Council of Societies of Industrial Design. ICSID members world-wide have selected those companies and design studios from more than 20 countries which have especially contributed to the development of good design in the last century. As a non-governmental organization supported by nearly 150 Member Societies in over 50 countries throughout the world, ICSID's mandate is to advance the discipline and the practices of industrial design at the highest international level.
