One out of every seven flowering plants on earth is an orchid and interest in orchids has risen dramatically in recent years. The orchid is used for everything from medicine for elephants to an aphrodisiac ice cream and now for a book of stained glass projects.

Chantal Pare combines her considerable expertise on orchids with her natural ability for glass design. Anyone interested in these exotic flowers will appreciate Chantal's careful attention to detail, in an effort to create lifelike replicas in glass. The author has included descriptive botanical information for each orchid variety, plus detailed glass suggestions to help transform your art glass Orchids into authentic reproductions.
