The book takes a classical approach to teaching woodworking, introducing fundamental tools and shop practice. It is a solid, systematic learning tool for the advanced beginner seeking to master the basics of woodworking craftsmanship. This is a book with a strong point of view. It is the basis of the two-week basic woodworking college class that the author currently runs at the Centre for Furniture Craftsmanship in Rockport, Maine. It pushes the idea that learning basic skills is essential to craftsmanship. This is a valid teaching approach based on a long tradition of European apprenticeship (as espoused by Tage Frid, Alan Peters and James Krenov). There is good pedagogical precedent for the idea that learning it right (the techniques and the principles) is an essential foundation. One can always depart from it later, using shop aids and power tools to do a process more quickly or efficiently..

Hand tools are to power tools what walking is to driving. Walking is about the journey; driving is about the destination.

## 书评

事情就是这样，没有的时候总是想要。真正拿到手上翻完了，也就那样！当然这是站在一个设计者的立场来看待这本书。板式家具的廉价、易用直接到这这种经久耐用的家具成为昂贵的物品。市场需求的萎缩更是让老木匠带着一辈子累计的下来的手艺走进了坟墓。在大家连房子都不太买...
