Art/Invention/House is an authoritative and handsomely illustrated presentation of forty new houses-many published here for the first time-exploring the creativity of top architects around the world, ranging from firms that specialize in residential work to those for whom a house is a rare indulgence. The houses shown here are understated or audacious, but never conventional. Each of these cutting-edge projects, whether built in town or country, represents a world apart from its surroundings. Some have only trees for neighbors; others are shoehorned into tight urban sites, perch on precipitous slopes, or cling like limpets to the coastline. But every house is one of a

kind, the product of dialogue between demanding clients and creative designers around the globe. The book includes the world-renowned firms of Archi-Tectonics/Winka Dubbeldam, Will Bruder, Wallace Cunningham, Gwathmey Siegel, Steven Holl, Rick Joy, Thomas Phifer, and Richard Meier in the US; TEN Arquitectos, Alberto Kalach, and Michel Rojkind in Mexico; Marcos Acayaba and Marcio Kogan in Brazil; Seth Stein in the UK; Alberto Campo Baeza in Spain; Herzog & de Meuron in Switzerland; Georg Driendl and Hugo Dworzak in Austria; Jyrki Tasa in Finland; Alvaro Siza in Portugal; Tadao Ando, Shigeru Ban, Hitoshi Abe, and Kengo Kuma in Japan; and Glenn Murcutt and Harry Seidler in Australia.
