By the end of the 21st Century it is thought that three-quarters of the world's population will be urban; our future is in cities. Making these cities healthy, vibrant and sustainable is an exceptional challenge which this book addresses. It sets out some of the basic principles of the design of our future cities and, through a series of carefully-selected case studies from leading designers' experience, illustrates how these ideas can be put into practice.

Building on the first edition's original format of design guidance and case studies, this new edition updates the ideas and techniques resulting from further research and practice by the contributors. This book emphasises the enormous progress made towards exciting new designs that integrate good design with resource efficiency.

作者介绍:

Adam Ritchie is a Partner of Max Fordham LLP and leads the practice's sustainable urban design group.

Randall Thomas is a consultant to Max Fordham LLP, a Visiting Professor at the University of Cambridge and Professor of Sustainable Environmental Design at Kingston University.
