Designing and building hospitals is an extraordinarily complicated and expensive task, which requires technical skill and design innovation. Hospital Builders brings together a selection of key projects from around the world to provide the ideal reference for anyone working in this area. Each of the projects has been specifically chosen for their

blend of innovation and practicality and are extensively illustrated with images, photographs, plans and explanatory text. - Anthony Monk is a co-founder of HLM Architects - Britain's premier specialists in health care design. - Comprehensive study of a wide variety of styles of hospital buildings. - Beautifully and extensively illustrated throughout.
