isbn:9781843402275

Every desk in the world is littered with them; we use them up without even thinking about it. Like elastic bands and paperclips, the desk note is ubiquitous. This unique book shows you how to reach out during those dull moments at work, during an interminable phone call, or boring meeting, peel one off and craft something beautiful. Specially devised by David Mitchell, expert and innovative origamist, these fun designs are easy to make and attractive. Within a short space of time you'll be able to fold complicated-looking origami from simple desk notes, delighting and impressing your

co-workers. Including 3-D animals, posies that can be used to attach messages, geometric designs, and much more, the 20 projects are shown in clear step-by-step diagrams with photography of the finished piece to show what it should look like. Each has been designed to make use of the sticky part of the note. With Sticky Note Origami to hand you need never be bored at work again.
