著者:Pages Ruiz, Fernando

出版者:Random House Inc

出版时间:

装帧:Pap

isbn:9781561585960

The first comprehensive guide of its kind, Building an Affordable House is for homeowners and building contractors who want to incorporate proven cost-saving techniques into their projects. Written by a contractor who has been nationally recognized for his innovative approach to cost control, this book shows readers how to generate significant savings on major projects such as building a new home or adding

on to an existing one. The first section provides an economical approach to planning projects, while the second reveals the quality-conscious, cost-cutting strategies the author has uncovered through direct construction experience and extensive consultation with industry experts. The third section covers finish details from drywall to flooring, with emphasis on saving money without compromising quality or distinctive results. Handy features include floor plans, resource listings, and project management tools.
