The shaper is a stationary woodworking machine used to produce decorative mouldings, edges, and joinery. Every production shop has always had a shaper, but now advanced home woodworkers are increasingly likely to own one of these versatile

machines because they are affordable and because they greatly expand the capability of a shop. A shaper, however, is one of the trickiest woodworking machines to operate properly and safely. This handbook explains hundreds of shaper techniques and illustrates each with drawings and photos. Advice is offered about what to look for when buying a shaper, and maintenance, troubleshooting, and tune-up are also covered.
