When meetings drag, workdays seem to go on forever and the mind begins to lose focus, there's only one thing to do: let them fly! These sticky note paper aeroplanes are a marvellously simple, low-tech way to step back from a difficult problem and take a much-needed breather. Best of all, the adhesive on the notes eliminates the need for difficult folds. The designs range from the basic dart to more complicated multi-sheet aircrafts patterned after American "X" and Century Series fighters. And for those dreamers with a little patience, there's a final "imagination" section that sends the paper plane soaring into new territory!
