Greene & Greene furniture, widely recognized as the finest expression of the American Arts & Crafts movement, is presented here for the first time as working shop drawings. Featuring accurate front, side, and top views, complete cutting lists, and

comprehensive section and detail views, these drawings offer today's woodworkers a unique opportunity to reproduce the rare furniture line, which has often been photographed but not presented in such detail. Including introductory chapters on both the Greenes and the Halls, an extensive discussion covers suitable woods and finishes and provides solid technical information on how to make such characteristic Greene & Greene details as proud ebony plugs and splines, breadboard ends, and cloud lifts.
